Subject: Florida Assumption of Section 404 Permitting

Hello EPA:

Please approve the transfer of Federal Section 404 permitting responsibility to the Florida Department of Environmental Protection. No one cares more about protecting Florida's wet lands than the citizens of Florida and the FDEP. FDEP personnel are typically long time Florida residents and are graduates of Florida universities. The FDEP is much more accessible to citizens with questions and concerns than Federal agencies. Transferring Section 404 to the FDEP will both improve the protection of the wet lands and eliminate duplication of effort by both the FDEP and the federal government.

Thank you for your consideration and "be safe"!

J Carl Blow
